Re: Flyway HASP – Revision 2

Dear Jim:

Please find enclosed the signed copy of the *Health and Safety Plan* (HASP) for the Flyway site in Libby, Montana. Your comments have been addressed and Mr. Tom Koch had two minor changes for the HASP. On page A-23, the last paragraph, next to last sentence, the word "quantitative" was changed to "qualitative." On page 3 of the Attachment B, first paragraph, the pore size of the filter for the Phase Contract Microscopy was changed from 0.45 microns to 0.8 microns. In the next sentence there was a typo and the Transmission Electron Microscopy pore size now reads 0.45 microns.

It is believed that the document as prepared reflects your thinking and is fully adequate to provide the necessary protection to personnel and the environment.

Please advise if there are any questions.

Yours very truly,

  
R. R. Marriam
